

# **Buckles**

## Quick release buckle QRF

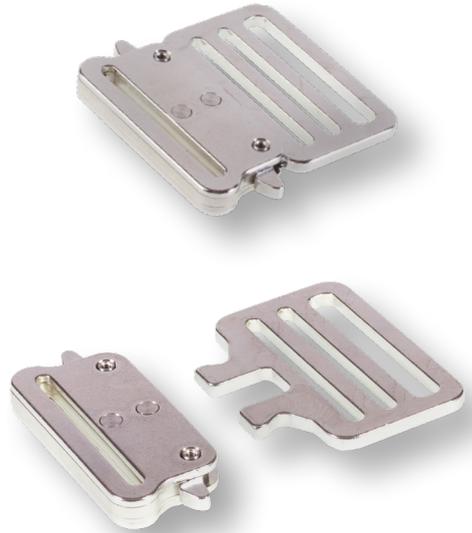

The quick release buckle for straps 50 mm (2 in) wide.

The straps are attached through a simple hooking. For disconnecting them, both levers need to be lifted at the same time. The levers are designed in such a way that they are easy to be found and lifted even in diving gloves, with cold fingers from being in cold water.

The active part of the buckle (the one with the levers) is attached to the strap via threading through and sewing, eventually through a top for a double strap #1731 (order separately). The passive part is attached via threading through.

The QRF buckle is not to be used for climbing, skydiving or in any other way where its use could pose a risk to one's life. The QRF buckle was designed for attaching straps of diving apparatus and its construction is not suited for static and dynamic strains, which are in climbing or skydiving.

The weight of the buckle (both parts) is 134 g (4.7 oz). (#8032)

## QRF Buckle, active part

Separate active part of the QRF buckle. Can be combined with different passive parts. The weight of the active part of the buckle is 78 g (2.7 oz). (#8101)

## Ladder lock

Ladder lock for 50mm (2in) wide straps. Made from 4mm (5/32in) stainless steel. The weight is 32 g (1.1 oz). (#1162)

## QRF buckle, passive threading through part

Separate passive part of the QRF buckle, designed for a firm threading through of the strap.

The weight is 56 g (2 oz). (#1164)

## QRF buckle, adjustable

Passive part of the QRF buckle. It enables the tightening of the attached strap by pulling on the loose end.

The loose end of the strap should be bended twice and sewn through to prevent its unintended unthreading when the buckle isn't in use.

The weight is 62 g (2.2 oz). (#7062)

## Lock for a double strap

Ladder lock for a double strap 50 mm (2 in) wide. It is used for attaching two straps, fixating the active part of the QRF buckle and other.

The weight of the lock is 34 g (1.2 oz). (#1731)

## QRF buckle, passive part

Separate passive part of the QRF buckle, designed for sewing on the strap.

The weight is 32 g (1.1 oz). (#1201)

## Titanium ladder lock

Firm and light ladder lock for straps 50 mm (2 in) wide. It is made from 3 mm (1/8 in) thick titanium.

The weight is 14 g (0.5 oz). (#1734)
